

ES 308H-15

SMAW

Type Basic

E308H-15

ESWECO
The Art of Welding

Description

ES 308H-15 is a basic coated, stainless-steel electrode of the 308H type. The electrode is designed for high-temperature applications in petrochemical and chemical process plants.

ES 308H-15 is widely used in petrochemical and chemical process plant, particularly for the fabrication of cyclones, transfer lines operating in the range 400-815°C.
