The Art of Welding

## Description

ES 47.00 is an extra-high quality LMA electrode, particularly suitable for on-site welding. ES 47.00 yields a homogeneous, high-quality weld metal with an extra low content of impurities. The electrode operates well on AC as well as DC positive and negative. DC negative is preferred, as it produces a small, easily controlled weld pool, minimising the risk of burn-through or undercutting.
